Professional Summary

Python Django Developer with hands-on experience building and maintaining production applications using Django, Django REST Framework, PostgreSQL, and REST APIs. Skilled in backend development, authentication, role-based access control, database optimization, automation, debugging, and production support across healthcare, NGO, e-commerce, workforce, and legal-AI domains.

Technical Skills

Languages: Python, SQL
Frameworks: Django, Django REST Framework (DRF)
Databases: PostgreSQL
Backend: REST APIs, Django ORM, Authentication, Role-Based Access Control
Frontend: HTML, CSS, Bootstrap
Version Control: Git, GitHub
API Tools: Postman

Professional Experience

Python Django Developer

M7 Corporation

July 2025 – Present
Chennai, India

- Developed Django applications across healthcare, NGO, e-commerce, and legal-AI domains.
- Built secure REST APIs using Django REST Framework, serializers, validation, and custom authentication.
- Designed PostgreSQL database schemas and optimized Django ORM queries for improved performance.
- Implemented authentication and role-based access control features for different user roles across multiple platforms.
- Supported deployment and maintenance of Django applications in production environments.
- Built PDF generation (WeasyPrint), Excel import/export (openpyxl), and email/SMTTP automation features.

Projects

Thaagam.org – NGO Management & Donation Platform | Python, Django, PostgreSQL, Bootstrap, openpyxl (Live)

<https://thaagam.org/>

- Developed the Crowd Fund Education module, including donation tracking, student forms, and administrative workflows.
- Built student, staff, zone, centre, and batch management modules with role-based access control and approval workflows.
- Developed campaign automation tools, including RM Bots, ZIP Upload Bot, image mapping, and image quality-control utilities.
- Implemented inventory stock logic, referral donation forms, Excel import/export, database updates, and SEO improvements.
- Fixed production issues across donation pages, image galleries, campaign modules, and administrator workflows.

GCC Workforce & Attendance System | Python, Django, PostgreSQL (Live)

<https://privateworkforce.gccservices.in/>

- Developed the workforce and attendance platform from the ground up with role-based dashboards and administrative workflows.
- Built Attendance, Leave Approval, Education, and Park dashboards for workforce monitoring and verification.
- Implemented zone-, centre-, and batch-based configuration with Excel upload, filtering, and secure data management.
- Performed role-based testing, data validation, workflow verification, and UI improvements across dashboard modules.

M7 Corporation & M7 Digital Dashboard | Python, Django, Bootstrap, AJAX (Live)

m7corporation.tech/dashboard | m7.digital/dashboard

- Set up the M7 Corporation dashboard and developed backend modules for internal project and content management.
- Integrated and enhanced the Label Bot workflow through development, testing, and production bug fixes.
- Updated project listings, product pages, AI Fashion content, client logos, and project detail pages.
- Improved the M7 Digital mobile navigation and developed content and UI components for the Help Desk module.

AcustomSong.com | Python, Django, PostgreSQL (Live)

<https://acustomsong.com/>

- Built a chat application connecting Relationship Managers and Song Creators through a structured communication workflow.
- Tested message flows, refined the user interface, and validated core user interactions.
- Resolved messaging workflow issues and improved reliability across chat-related features.

Education

Shree Krishna Chaitanya Institute of Science & Technology

Master of Computer Applications (MCA)

Nellore, India
2025 – Expected 2027

Shree Krishna Chaitanya Degree College

Bachelor of Computer Applications (BCA)

Nellore, India
2022 – 2025
